Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is a first office action in response to application filed 1/10/2002. Claims 1-18 are presented for examination.

This application is related to application with US serial number 09/321,984, now patent number 6,360,272.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 1/10/2002 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

The change of address filed 12/20/02 has been entered in the file.

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because it contains "e.g." language.

Correction is required. See MPEP § 608.01(b).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,360,272. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application are inherent in the claims of US patent number "272".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 16-18 rejected under 35 U.S.C. 102(e) as being anticipated by Schmidt, Jr. et al. hereinafter "Schmidt" US patent Number 6,778,642.

As per claim 16, Schmidt provides a unified messaging system that includes a computer program product comprising: a computer usable medium having a computer readable program code embodied therein including an interface to a mail agent on a client (fig 1 col. 4 lines 14-26) and a unifier (UMS), the interface permitting the unifier to access a message on the client (see abstract; col. 5 lines 37-49; col. 5 lines 13-39) and update the view of the message in the mail agent on the client (col. 2 lines 54-65).

As per claim 17, Schmidt interface comprises a messaging application programming interface compliant interface (col. 6 lines 13-39).

As per claim 18, Schmidt discloses a unifier that can selectively update a unified view of a message on a second client using either a high cost communication channel or a low cost communication channel (see abstract; col. 2 lines 30 et seq where Schmidt uses either wire (low cost communication) or wireless (high cost communication) and update (modify) views of messages col. 2 lines 62-65 using either channel discussed above).

Claims 1-15 will be allowed upon applicant filing of a terminal disclaimer.

The following prior art are cited for disclosing pertinent limitation of the claimed invention. Applicant is requested to consider these prior art upon responding to this office action.

Picard et al. 6,233,318 discloses a unified messaging system that provides a multimedia mailbox.

Pepe et al. 5,742,905 discloses internetwork communication that provides a network subscriber with the ability to remotely control the receipt and delivery of wireless and wireline voice and text messages.

Luzeski et al. 6,301,245 discloses a universal messaging system.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frantz B. Jean whose telephone number is 703 305 3970. The examiner can normally be reached on 8:30-6:00 M-f.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Zarni Maung can be reached on 703 308-6687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
